

Discomatic Mambo

The best just got better

Discomatic Mambo

Made in Switzerland

1720 m ²	Theoretical area performance
43 cm	Working width
36 l	Fresh / waste water tank
3.6 h	Battery life

The Discomatic Mambo from Wetrok combines concentrated cleaning power and amazing endurance with almost limitless agility and effortless operation. The use of high-quality components and carefully designed details help to reduce operating costs and increase efficiency. In addition, they enable environmentally friendly cleaning with outstanding results – ideal for greater cost-effectiveness per m² on small and medium-sized areas.

Power Whirl
Patented and innovative for maximum suction efficiency

Lithium iron phosphate battery
for consistently high performance

Automatic dosing system
for precise and demand-dependent use of chemicals

Quick Refill
Time-saving water filling with overflow protection

High-performance cleaning quality

Manoeuvrable and compact for every cleaning job

Durable thanks to robust construction and reliable technology

Effortless servicing and simplified handling

High cleaning performance thanks to double discs / brushes system

Two efficient discs / brushes guarantee brilliant cleaning results and particularly high brush pressure. Combined with our powerful lithium iron phosphate battery, a long service life is ensured.

Effortless guidance with Self-Drive

Supported by the double drive system, the powerful Self-Drive effect delivers ergonomic and comfortable propulsion. This makes guiding the machine precise and easy.

Intuitive operation

From activating the brushes and suction to adjusting the amount of water – with just four control buttons, using the machine is extremely easy and eliminates lengthy training with staff.

Ergonomic and manoeuvrable

The height-adjustable handle can be adapted to body size and different situations even when the machine is running. Turning at tight angles and corners are no problem, plus it takes up surprisingly little space when transporting or storing.

Easy transport thanks to support wheel

Once the cleaning job is complete, a support wheel is automatically lowered to lift the machine. This makes it very easy to transport the machine from one location to another.

Whisper-quiet cleaning

Noise reduction to 60db(A) thanks to the sound-insulated suction motors enables economical cleaning of highly frequented and noise-sensitive areas without any loss of performance.

HEPA filter for the highest standard of hygiene

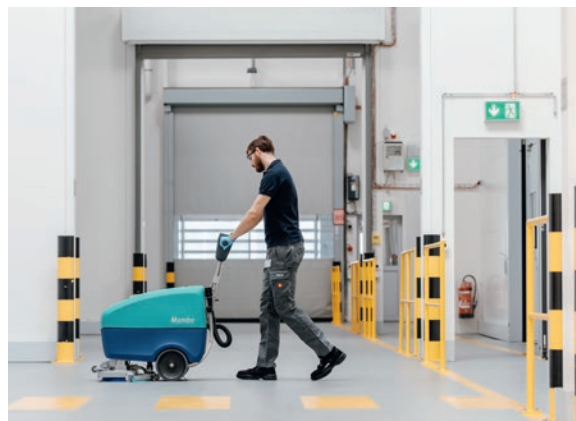

The easily replaceable HEPA filter cleans the outgoing exhaust air and significantly reduces the spread of germs. This ensures increased hygiene and safety, especially in sensitive areas.

Simplified handling

The patented magnetic suction lips can be replaced without tools. Water can be refilled automatically and quickly with Quick Refill. The well designed tank guarantees quick and easy cleaning.

Discomatic Mambo: for efficient and thorough cleaning of small to medium-sized areas in care facilities, industrial buildings, airports, schools, restaurants, stores, office buildings, etc.
